

Single APP to manage Energy, Environment, Fire Safety, Intrusion & Security

Real-time alarms

Monitor assets at all sites

Historical as well as real-time images and videos

Real-time notifications

Access individual sensors

Configure sensors, meters & cameras from the App

BANKING INFRA MANAGEMENT

Integrated energy, environment, fire safety, intrusion and security on a single platform

View energy consumption patterns of different loads like Air conditioners, lighting load, IT load etc. and design appropriate energy control methods

Monitor fire sensors, door status, intrusion, grid parameters, generator parameters, battery parameters and health, UPS, HVAC systems, Air conditioners, temperature, humidity etc.

Automated reports in web, APP, and pdf formats using statistical/AI/ML/CV

Instant alarm status on APP for energy, fire safety, and security

Integrated battery and UPS management

Smart cameras with onboard computer vision to detect & deter threats

RESULTS & OUTCOMES

Save up to 20% energy consumed by small medium buildings

Correlate and benchmark across your multiple sites and arrive at appropriate energy conservation process

Enhance equipment and infrastructure health and uptime

Get control over your business continuity

Get control over power quality and Earth integrity

6TH ENERGY SENSOR SUITE

6TH ENERGY UNIQUENESS

APP based configuration for sensors, meters & cameras

Common Platform for all kinds of sensors, meters, cameras & devices

Incorporates elements of Computer Vision for threat detection

Wired interface for sensor - meter communication with WiFi backup

Advanced AI/ML/CV based insights

Proven technology & solutions with over 100,000 sensors deployment

6th Energy Technologies is a full-stack commercial IoT company. Our core values is radical customizability overlaid onto a constant and reliable 6E platform, dramatically shortened time to market, and relatively small production times.
