

Single APP to manage Energy, Environment, Fire Safety, Intrusion & Security

Real-time alarms

Monitor assets at all sites

Historic as well as real-time images & videos

Real-time notifications

Access individual sensors

Configure sensors, meters & cameras from the App

TELECOM INFRA MANAGEMENT

Remotely manage energy, environment, fire safety, intrusion and security at indoor shelters, outdoor cabinets, BSS sites, MSC, and data centers

Monitor and control generators, diesel tanks, batteries, rectifiers, inverters, UPS, air conditioners, solar panels, doors, temperature, and smoke

Dual SIM gateways with 2G/3G/4G and Ethernet fall back for communication

Automated reports in web, APP and pdf formats using statistical/AI/ML/CV

Optimize DG runs and Air conditioner utilization

Instant alarm status on APP

Cameras and IoT lock to monitor and enhance asset security

RESULTS & OUTCOMES

Reduce OPEX, fuel consumption, and pilferage

Save energy at your sites

Improve operational visibility

Enhance site asset security through cameras

Battery health and warranty at your fingertips

Enforce SLA with service providers effectively

Enhance infrastructure uptime

6TH ENERGY SENSOR SUITE

6TH ENERGY UNIQUENESS

APP based configuration for sensors, meters & cameras

Data Explorer to create any kind of reports across all sites with AI/ML/CV capabilities

Advanced Battery Health algorithm

Wired interface for sensor - meter communication with WiFi backup

Electronic visitor logging with IoT lock

Open interfaces between sensors, gateways & cloud

6th Energy Technologies is a full-stack commercial IoT company. Our core value is radical customizability overlaid onto a constant and reliable 6E platform, dramatically shortened time to market, and relatively small production times.
